

CAPABILITY STATEMENT

Established in 2010, Gooring Jimbila Contracting (GJC) is a 100% Aboriginal owned and operated civil contracting business based in Kununurra in the East Kimberley region of Western Australia.

With a focus on detailed earthworks, we specialise in providing top-tier civil maintenance and construction services and our expertise spans a range of projects, from intricate earthmoving and site preparation to comprehensive maintenance of civil infrastructure.

Our mission is to deliver exceptional service that exceeds expectation, and we are committed to fostering long-term relationships built on trust, quality and reliability.

The safety of our people is paramount and GJC operates under a comprehensive health, safety and environmental management system that is stringently applied to all works undertaken.

For over a decade GJC has delivered on projects around the East Kimberley and we are dedicated to shaping the future of civil infrastructure and facility management. Whether we are managing multiple subcontractors or coordinating engineering, GJC is reliable, professional and able to get the work done.

We embrace innovation, sustainability and integrity, and we can readily mobilise to project sites and communities around Australia, urban and remote.

Partner with us for your next project and experience the GJC difference.

OUR EXPERIENCE

Integrated Mine Services, Argyle Diamond Mine (2015 - 2021)

GJC commenced its operations through an initial major contract with Rio Tinto to manage general maintenance services across the Argyle Diamond Mine site.

This included roads, grounds, waste management, and bio-remediation management at the mine.

Since this time the business has consolidated its operations and performed contracts for a series of other clients and projects that demonstrate the confidence our clients have in our capacity and capability to meet contract deliverables.

Rydgens Iron Ore Mine (2019 - 2021)

Production based mining operations, including haul road maintenance, load and haul operations, dust suppression, refueling and servicing of plant and machinery, rom operations including stockpile management.

Savannah Nickle Mine (2020 - 2020)

This project involved a camp relocation at Savannah Nickel Mine. Ground preparation was undertaken, and foundations installed for placement of the camp. GJC installed all essential services such and power, water, sewerage, and construction of camp facilities.

General Site Services Contract, Argyle Diamond Mine (2021 - current)

The General Site Services is a multi-million-dollar contract as part of the Argyle Diamond Mine Closure project.

The contract includes maintenance of the accommodation village; all site facilities; airport maintenance and refueling of aircraft; grounds maintenance; plumbing and electrical maintenance (including the power station); waste management; Reverse Osmosis Plant, and mechanical servicing.

GJC continues to successfully manage the complexities of coordinating services across the mine and troubleshooting issues as they arise, resulting in a high level of client satisfaction.

Bulk Earthworks Contract, Argyle Diamond Mine (2021 - current)

Bulk Earthworks is a multi-million-dollar contract as part of the rehabilitation of the Argyle Diamond Mine. The contract includes load and haul; cut to fill to design levels; reprofiling to ensure drainage and water flow; rock armour manufacturing; spillway construction; scour protection; final trim work; removal of existing roads, culverts, and infrastructure; maintenance of existing roads and drainage systems; verge clearing; and fencing.

GJC continues to draw on its highly functional operating capacity and industry knowledge to work collaboratively with contractors appointed to other work packages to meet the projects outcomes for the client.

OUR SERVICES

Services offered by GJC are extensive and in combination provide clients with the ability to package their needs for multi-faceted projects:

- Waste management and remediation
- Project management
- Project engineering
- Quarry management
- Bulk earthworks and site preparation
- Detailed civil earthworks
- Culvert installation and upgrades
- Detailed shoulder reconstruction
- Service installation and decommissioning
- HSE management
- Relocation of camps including set up
- Site restoration and rehabilitation
- Management/labour hire
- Wet hire of mobile plant

OUR ACHIEVEMENTS

In 2023, GJC was certified as an Approved Company with respect to the ISO 45001 standard for Occupational Health and Safety Management Systems, and the ISO 14001 standard for Environmental Management Systems.

For two years running, in 2022 and 2024 (the awards running every other year), GJC was successful in winning the Indigenous Excellence category at the East Kimberley Business Excellence Awards.

GJC profits are invested into the Gelganyem Trust which delivers education, health, law and culture, community and economic development programs for Traditional Owners.

ISO 45001:2018 Approved Organisation

ISO 14001:2015 Approved Organisation

PLANT AND EQUIPMENT

GJC has a large fleet of owned and operated plant / equipment including:

- Loaders
- Graders
- Dozers
- Water carts
- Service trucks
- Backhoes
- Skid steers
- Excavators
- Articulated Dump Trucks

The business has a comprehensive and active preventative maintenance and mechanical servicing schedule to ensure performance and provide clients with confidence in reliability.

TESTIMONIALS

"I have worked in partnership with Goring Jimbila Contracting for the past six years at the Argyle Diamond Mine.

They have shown significant growth over the years and have become one of our main contract partners in the mine closure project. GJC have proven their ability to execute a broad range of civil, construction and infrastructure maintenance scopes.

I have enjoyed working closely with GJC and look forward to continuing that relationship into the future."

James Petch
Area Manager Site
Services
Rio Tinto

"Goring Jimbila Contracting is a multidisciplinary business that is delivering earthworks and infrastructure scopes for the closure of the Argyle Diamond Mine. GJC started working with Argyle during operations which set them up well to deliver good outcomes for the mine rehabilitation works currently underway.

They have shown considerable growth as a business, and I look forward to continuing working with them throughout the mine closure."
